Our Clients

Commercial License

GLS Landscaping Contracting is a multidisciplinary landscape and infrastructure contractor headquartered in Dubai, United Arab Emirates. The company specializes in the design and construction of large-scale landscaping works, waterways, artificial lakes, and site development infrastructure for both public and private sector clients.

Vision

Our vision is to set new standards for landscape contracting in the Middle East, building environments where infrastructure and ecology work together to support future generations.

Services and Capabilities

GLS Landscaping Contracting offers a complete suite of landscape and infrastructure services — from design and technical planning to full construction and long-term maintenance. Our multidisciplinary expertise allows us to deliver complex and integrated outdoor environments that balance functionality, aesthetics, and sustainability.

What we Specialize in?

Landscape Design

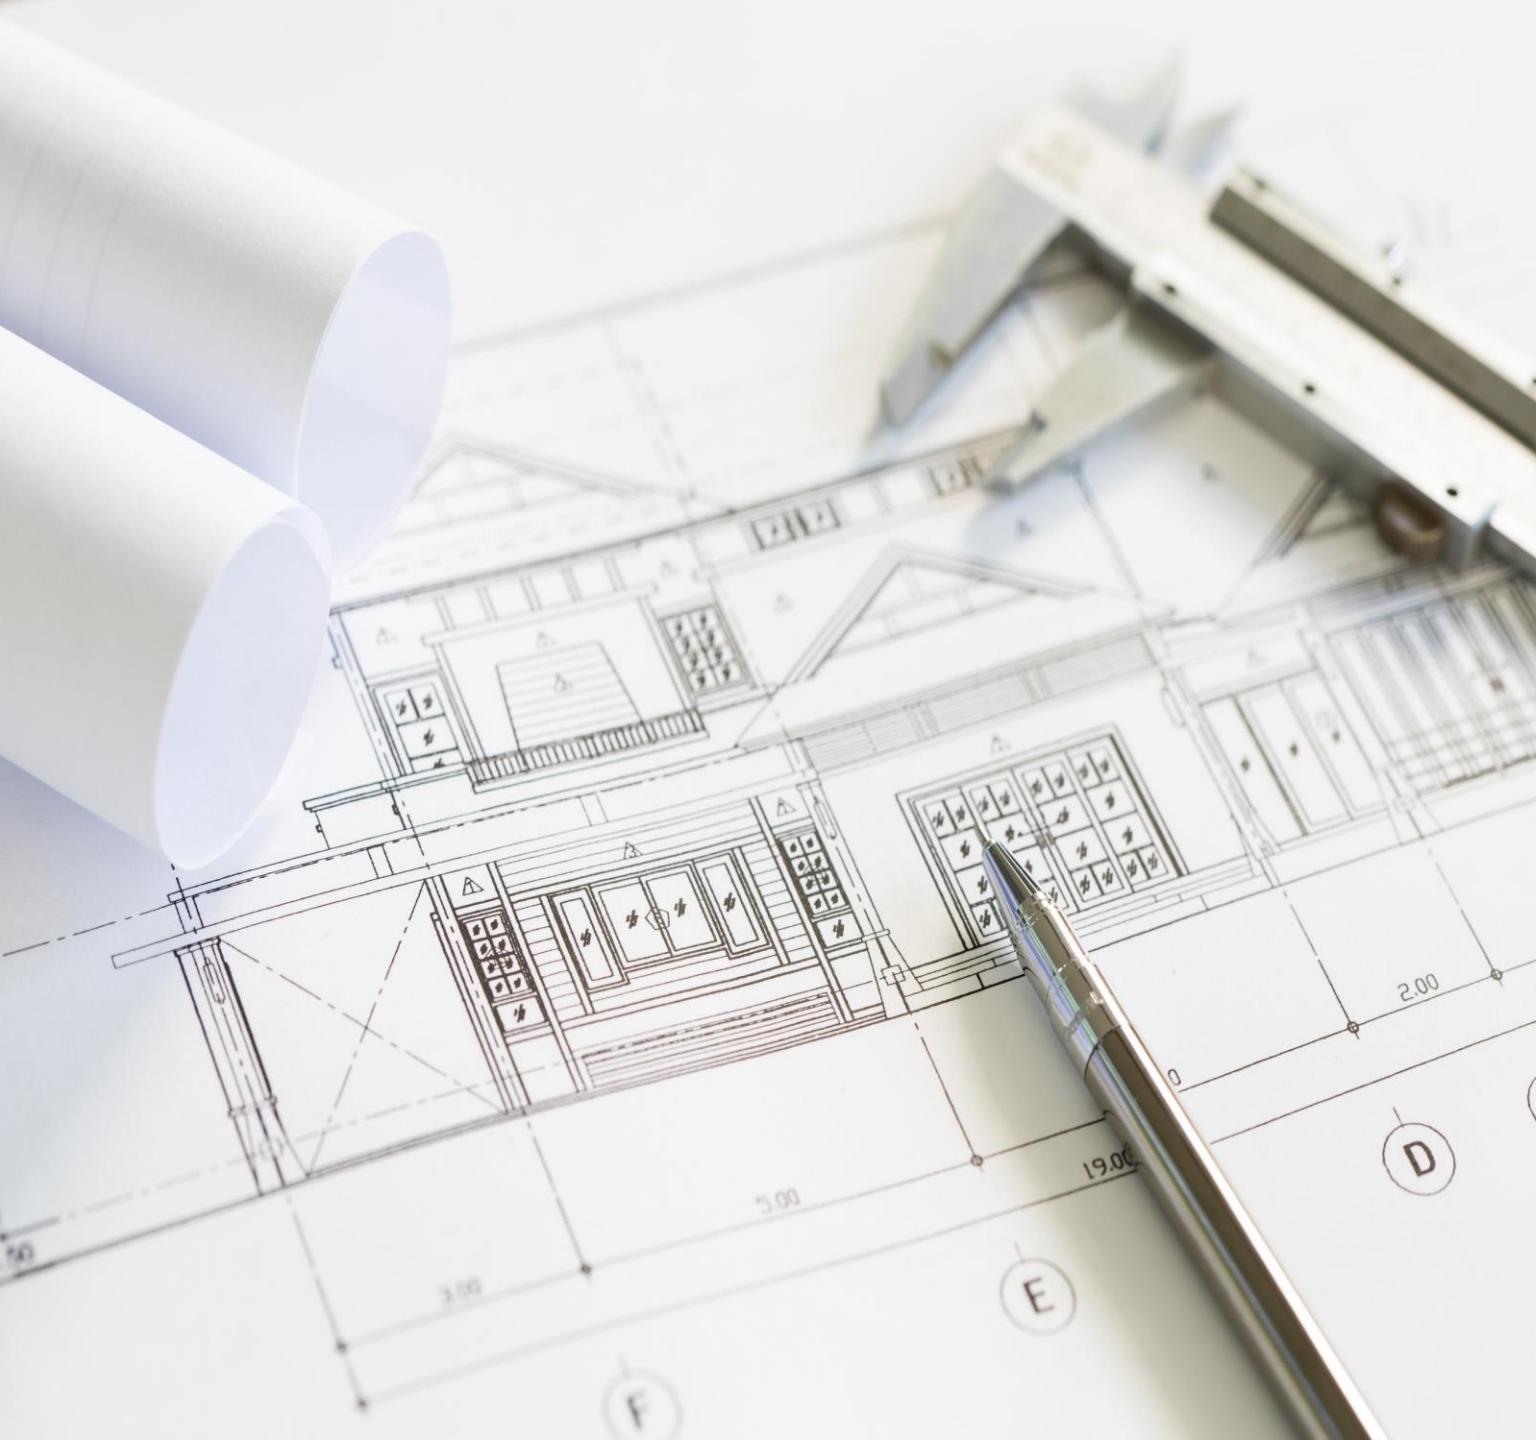

GLS Provides complete design services that transform ideas into buildable, sustainable environments.

Our design team combines architectural creativity with technical precision, offering:

- Concept development and master planning
- 3D CAD model design and visualization
- Detailed design drawings and documentation
- 3D animations and presentation models

We design with purpose — ensuring every layout, planting plan, and material selection aligns with environmental conditions, client requirements, and long-term maintenance efficiency.

Tendering and Estimation Support

Our Tendering and Estimation Department provides detailed & accurate documentation to support competitive and compliant project bids.

Key services include:

- **Preparing and reviewing tender and contract documents.**
- **BOQ and drawing analysis for accuracy and completeness.**
- **Material specification review and cost breakdowns.**
- **Full technical and financial proposal preparation**

This disciplined approach ensures transparency, precision, and alignment with project requirements and regulatory standards

Landscape Construction

GLS delivers end-to-end landscape construction services
For urban, residential, and recreational developments.
Our construction capability covers:

- Streetscapes and urban enhancements
- Parks and community landscapes
- Recreational and leisure areas
- Playgrounds and outdoor sports facilities

Every project is executed under strict quality,
safety, and sustainability standards. Our team
of engineers, supervisors, and craftsmen ensure
seamless coordination across all disciplines —
delivering projects that are both visually striking
and structurally sound.

Waterscapes and Artificial Lakes

Water is at the heart of GLS's expertise. We specialize in the design and construction of engineered water features — from decorative water bodies to large-scale artificial lakes and lagoons. Our in-house Civil and MEP teams provide full turnkey solutions including:

- Structural and hydraulic design
- Waterproofing, filtration, and circulation systems
- Pump stations, control rooms, and aeration systems
- Landscape integration and shoreline detailing

Whether creating a serene resort lagoon or an engineered stormwater retention system, GLS ensures that every water feature meets high standards of performance, safety, & sustainability.

Infrastructure Works

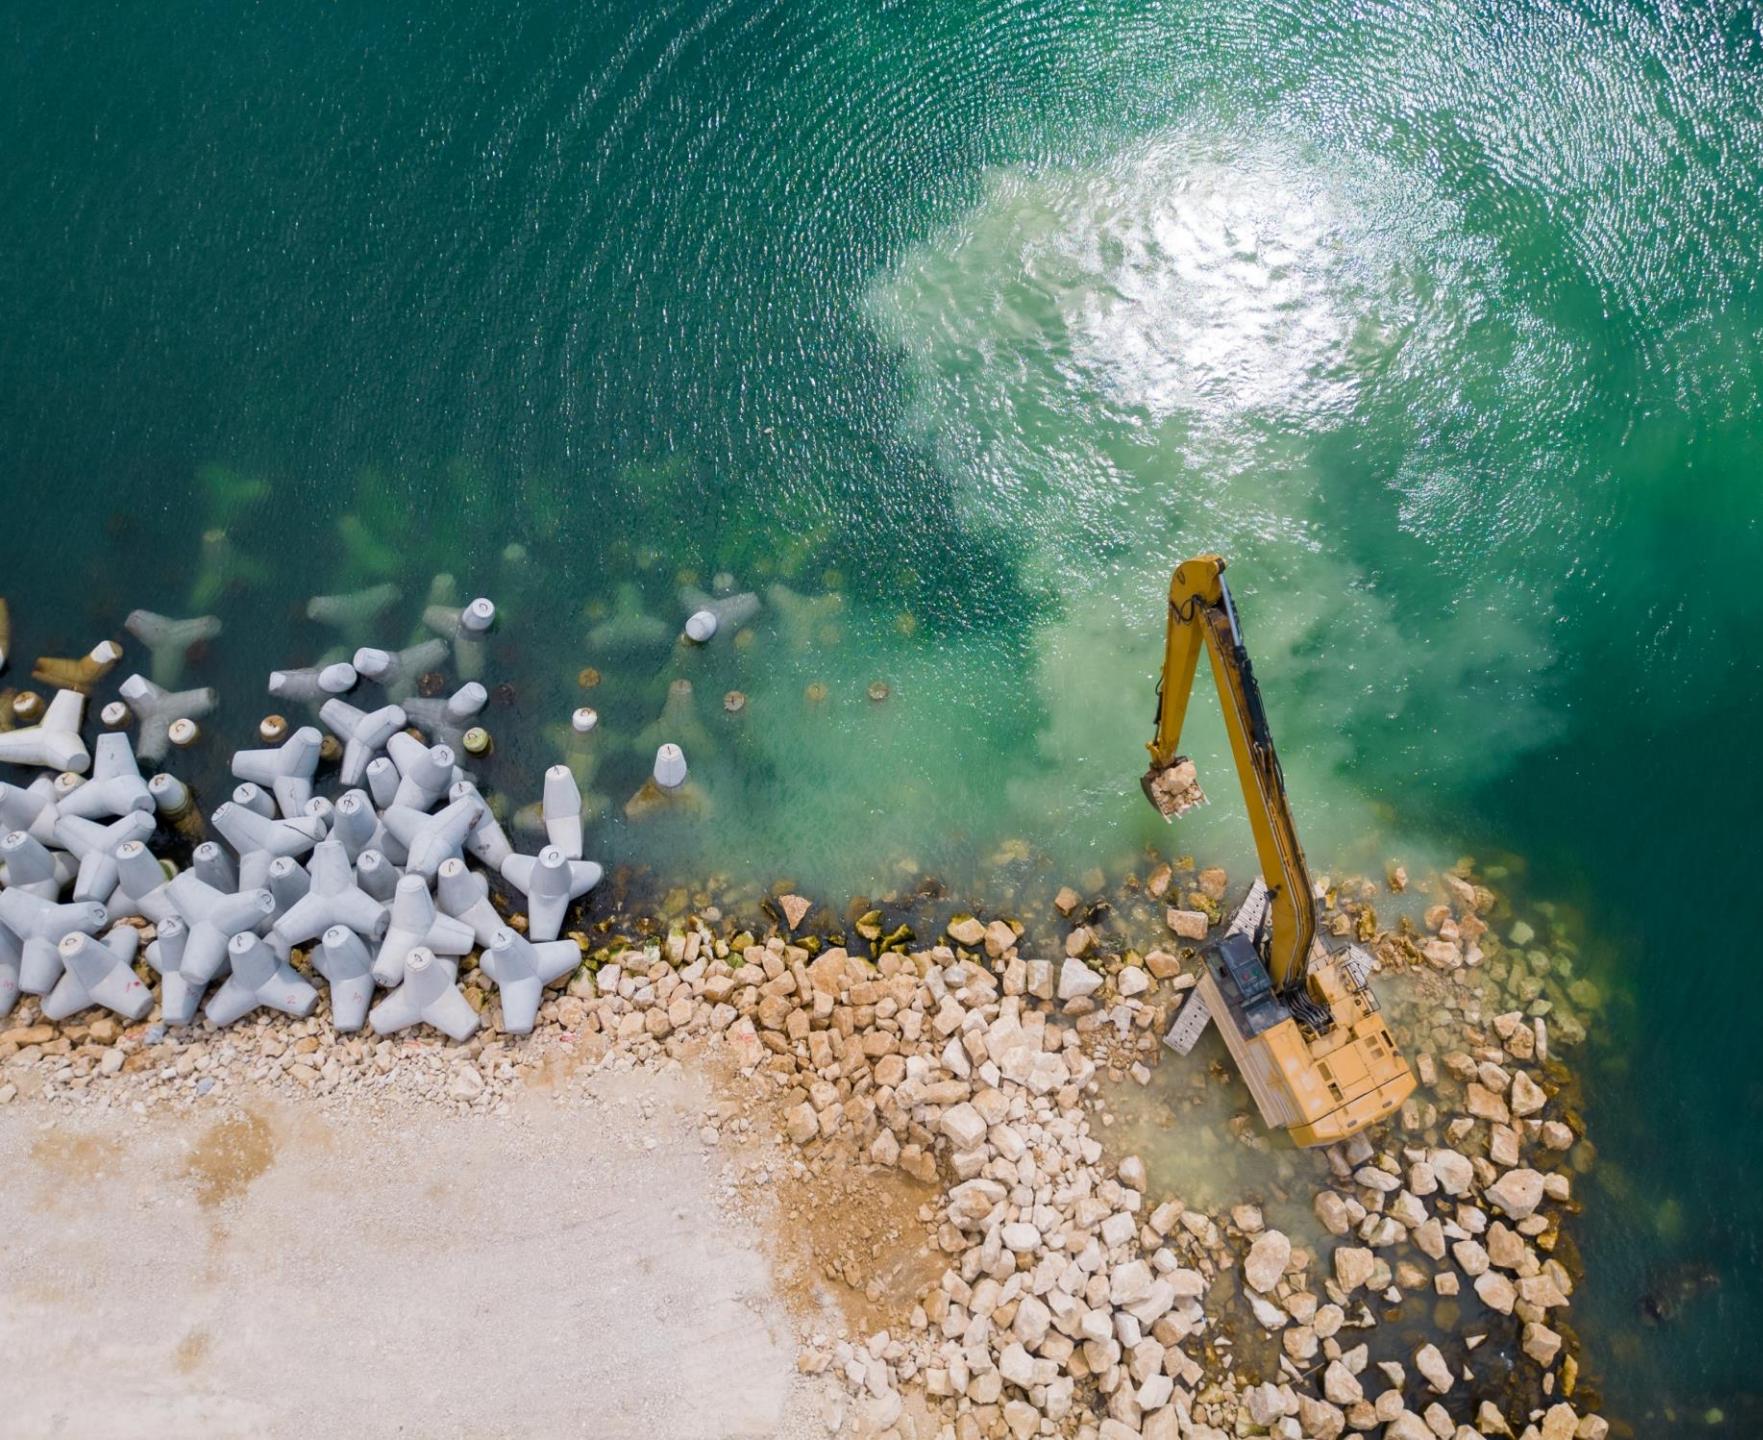

GLS provides comprehensive site infrastructure services that support modern developments and ensure efficient functionality.

Our capabilities include:

- **Sewage and stormwater drainage systems**
- **Potable and irrigation water networks**
- **Power Cabling and street lighting**
- **Telecom and data cabling networks**
- **Roadworks and paving**

By integrating infrastructure and landscape delivery under one contractor, GLS ensures seamless project coordination, minimized rework, and cost efficiency — reducing delays and improving long-term system performance.

Marine & Coastal Works

GLS undertakes specialized marine and shoreline construction works, designed to protect, enhance, and stabilize coastal environments.

Our expertise covers:

- Shoreline Protection & Rock Armoring
- Beach Formation and nourishment
- Breakwaters & Groynes
- Sea walls, piers, and overwater structures

Each project is executed with a strong commitment to structural integrity, safety, and environmental protection — ensuring the resilience of coastal developments and the preservation of marine ecosystems.

Project Maintenance

At GLS Landscaping Contracting, we aim to be your one-stop solution for all project needs—even after completion. We offer comprehensive maintenance services to ensure the long-term health and beauty of your landscape.

Our dedicated team of professional horticulturists and irrigation engineers provides ongoing care tailored to each project, including:

- Smart Irrigation System Management
- Plant Protection
- Pruning and Trimming
- Fertilization Programs

Sustainable Development

Sustainability is integral to every GLS project. We prioritize eco-friendly design and construction methods that conserve natural resources and minimize environmental impact.

Our sustainable practices include:

- Smart irrigation systems and water-efficient planting
- Biological filtration and natural water treatment
- Reuse of excavated materials and waste minimization
- Solar-powered water systems and lighting solutions
- Native and adaptive planting strategies

Through innovation and responsible planning, GLS contributes to the creation of resilient landscapes that endure and evolve with the environment.

Lets work together to strengthen our community capacity to live sustainably

Lets work together to protect , maintain and enhance our natural environment

Lets work together to create liveable region that encourages a sustainable industry and infrastructure

Sustainable Lagoon and Lake

At **GLS Landscaping Contracting** we specialize in the sustainable design and construction of lagoons and artificial lakes that blend seamlessly with nature while delivering long-term environmental benefits. Our water treatment practices prioritize ecological balance, water quality, and community value.

Using natural processes such as biological filtration, constructed wetlands, and smart circulation systems, we ensure that water remains clean, safe, and healthy. From solar-powered aeration and nutrient recovery to erosion control and native landscaping, every element is designed with sustainability at its core.

Whether for recreation, stormwater management, or wastewater treatment, our lagoon and lake solutions help preserve water resources and support local ecosystems — today and for generations to come.

Stormwater and wastewater management

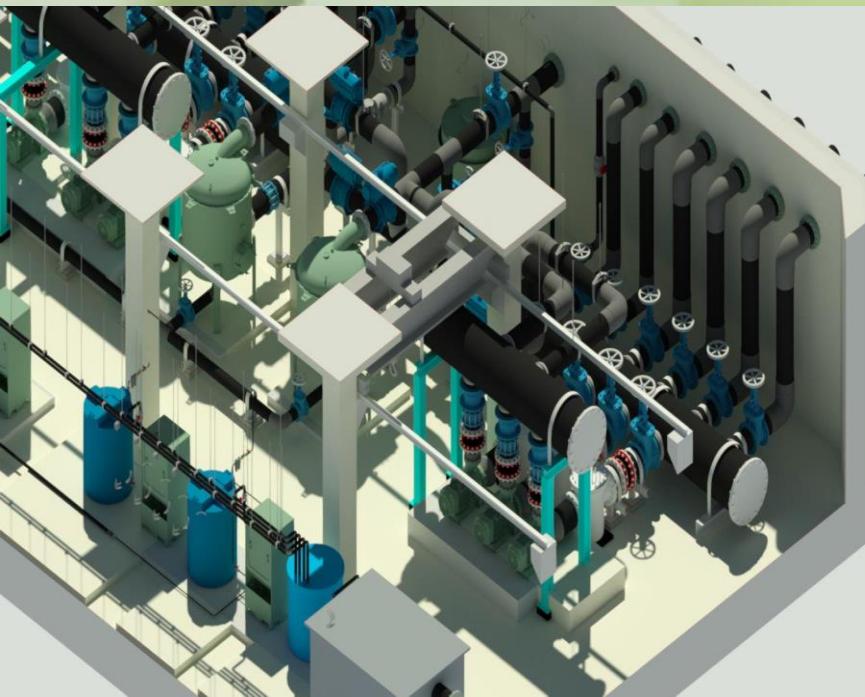

We provide integrated stormwater and wastewater management systems that protect the environment, enhance water quality, and support sustainable development.

Our approach combines innovative engineering with nature-based solutions—such as green infrastructure, bio-retention systems, and advanced treatment technologies—to effectively manage runoff, prevent flooding, and treat wastewater responsibly. We design systems that not only meet regulatory standards but also contribute to healthier communities and ecosystems.

Smart circulation systems

GLS Landscaping Contracting design and implement smart circulation systems that keep water bodies—such as lagoons, artificial lakes, and reservoirs—clean, oxygenated, and ecologically balanced.

Using energy-efficient pumps, solar-powered aerators, and automated flow controls, our systems promote consistent water movement to prevent stagnation, reduce algae growth, and improve overall water quality. Integrated with real-time monitoring, our smart solutions adapt to environmental conditions, ensuring optimal performance with minimal energy use.

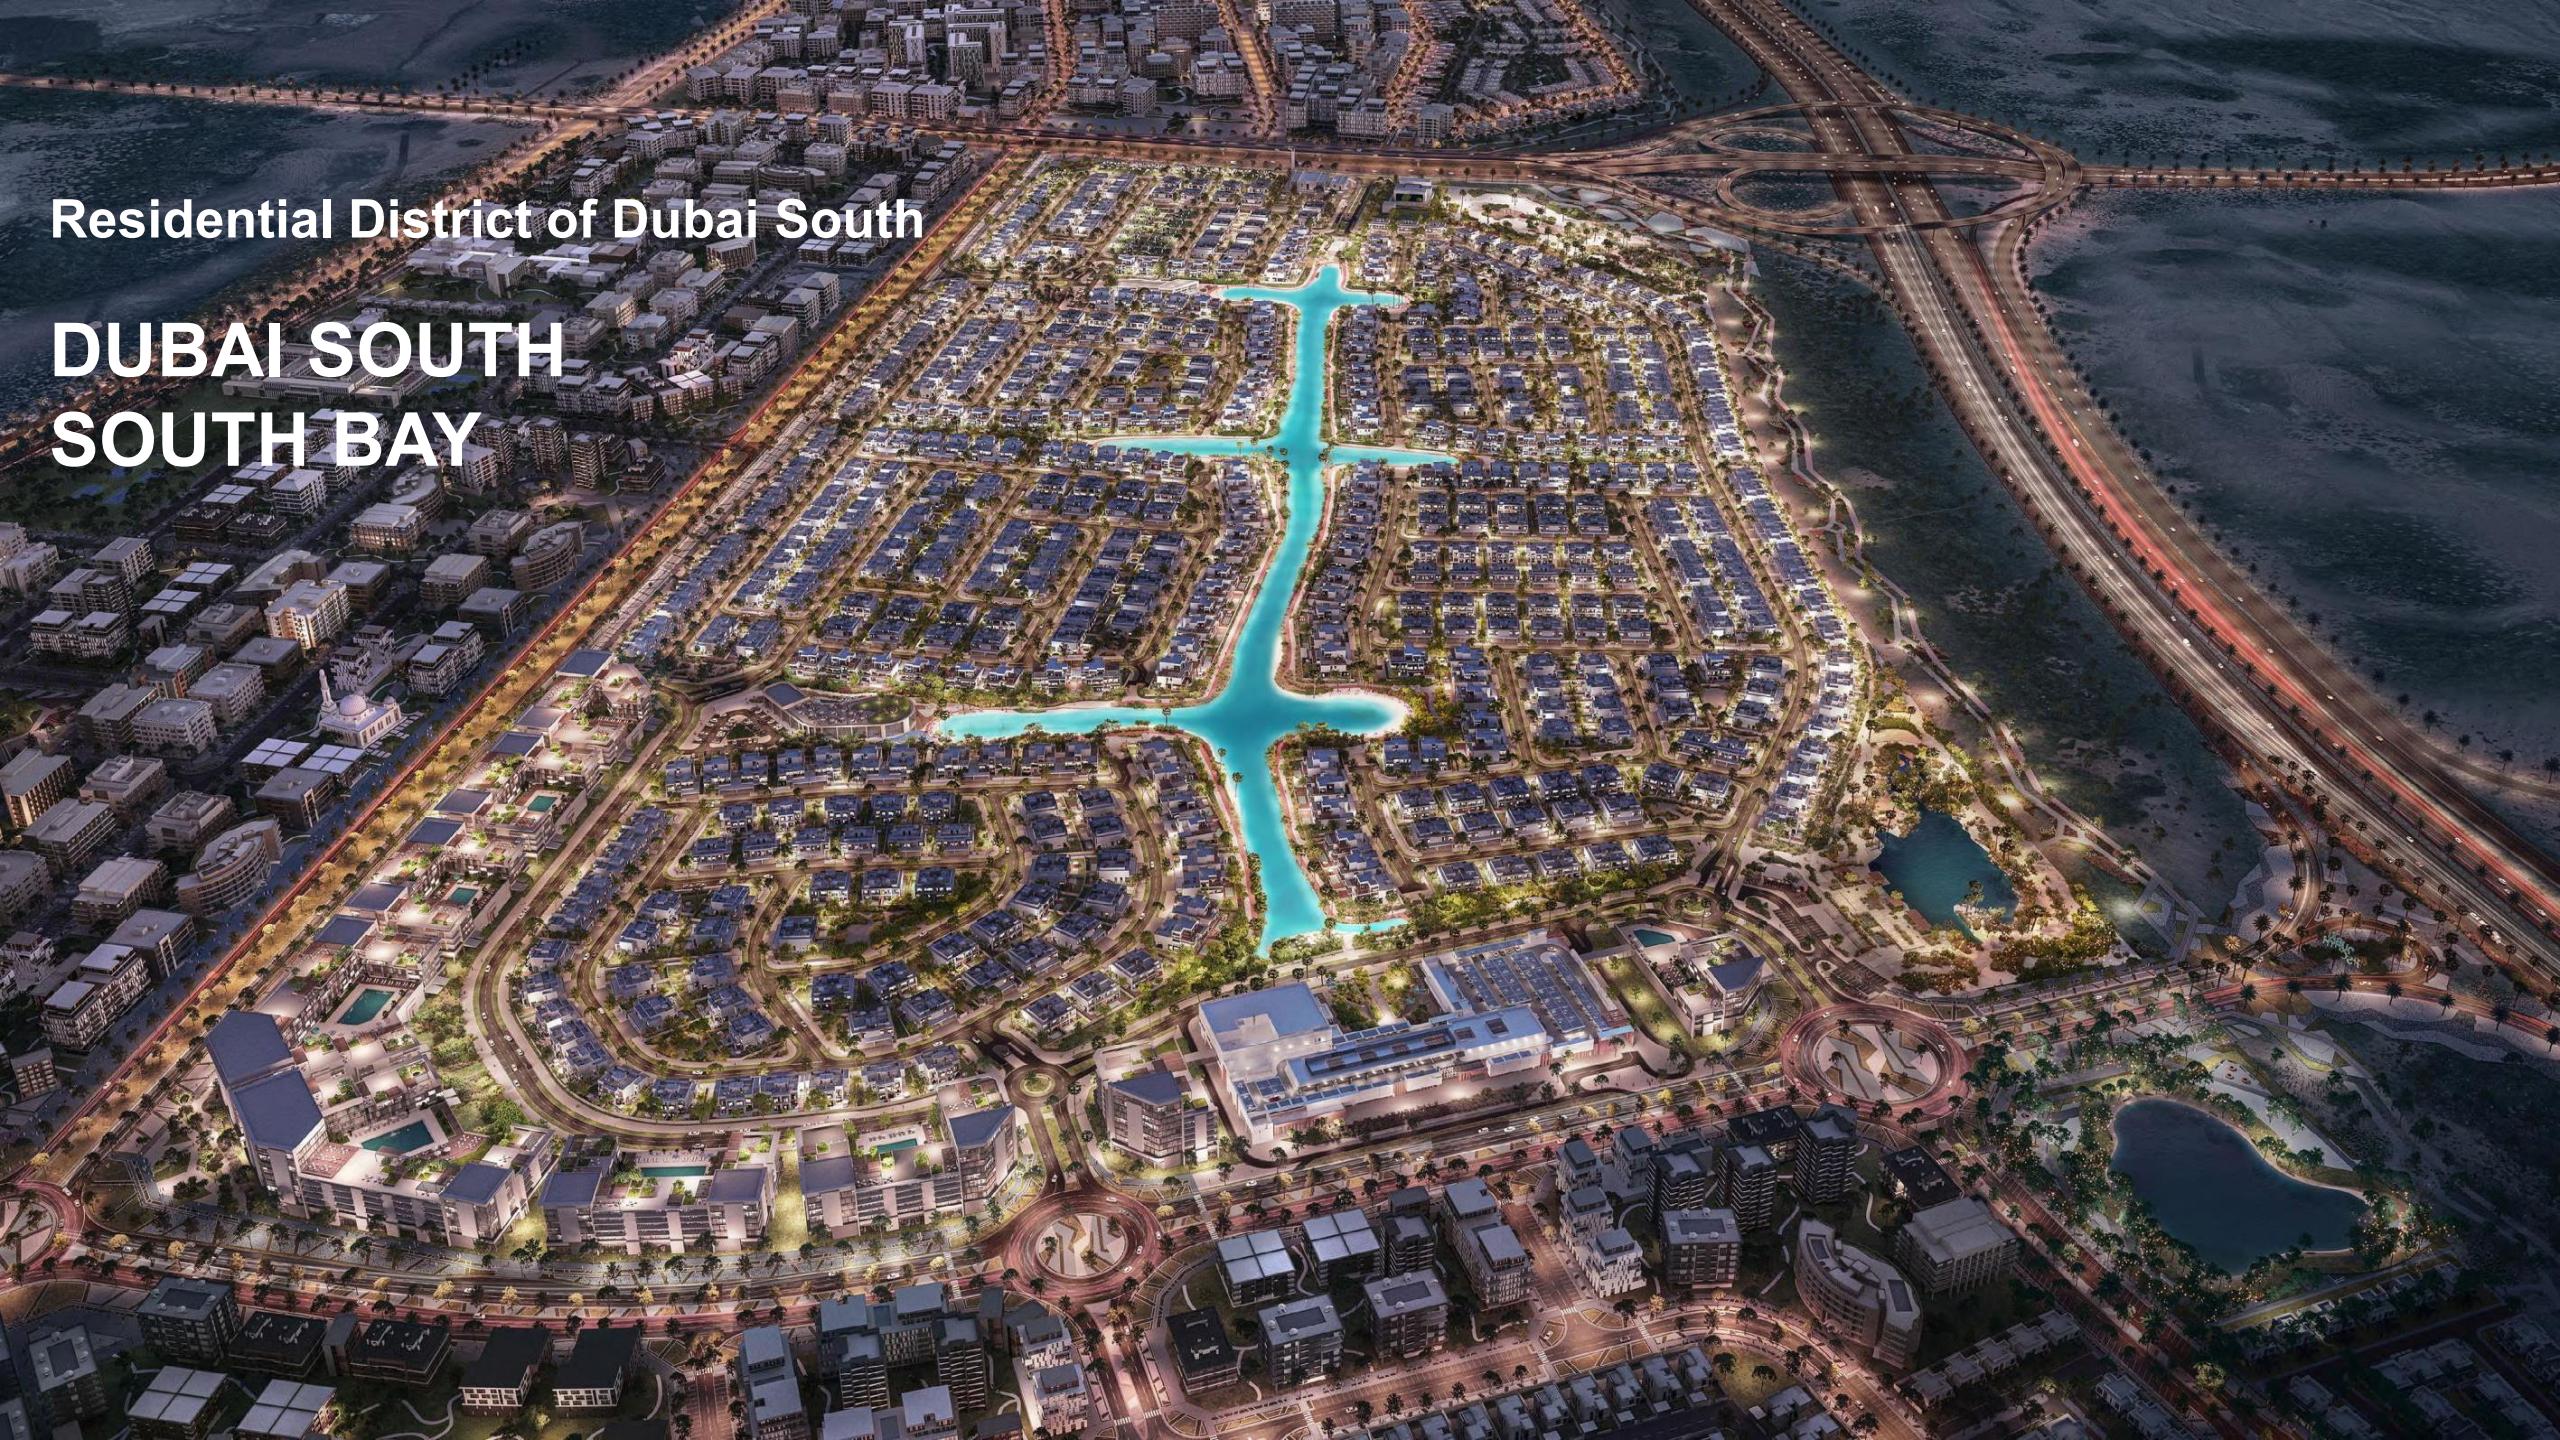

A vibrant, modern urban park scene. In the background, a large, modern white building with multiple levels and large windows is visible. Several palm trees are scattered throughout the landscape. In the foreground, there's a paved walkway where a man and a child are walking away from the camera. A tall, modern street lamp stands on the right. The middle ground features a grassy area with a small pond and some rocks, surrounded by various green plants and shrubs. The sky is clear and blue with a few birds flying.

Projects Highlight

Residential District of Dubai South

DUBAI SOUTH SOUTH BAY

- Client : Dubai south
- The work scope included design & built of Civil work, MEP lagoon , Swimming pools & pump rooms
- Lagoon Area 30, 623m², 6Nos. Swimming Pools, 2Nos. Kids Pools, 7Nos. Pump Rooms
- Out Door GYM, Kids play area & dog park
- **Landscape works of Dry, Wet ponds, Lagoon Surround & green belt**
- 677Nos. Palm Trees, 837Nos. Trees, Planting 41, 100m²

ROW LANDSCAPING AT DUBAI SOUTH

- Client : DUBAI SOUTH
- GLS Landscaping Contracting executing softscape and hardscape works, including plantation of 180Nos. trees, shrubs 13, 800m², paving 22, 300m² Furniture, lighting & play equipment construction

**AL GURM
DEVELOPMENT**

- Client : AL DAR
- GLS Landscaping Contracting executing softscape and hardscape works, including plantation of 484Nos. trees, shrubs 3, 900m², paving 21, 650m² Furniture, lighting & play equipment Construction

Riyadh City South Phase 4, Infrastructure & Streetscape Works

- Client : ALDAR
- GLS Landscaping Contracting project scope consists of construction of Road Paving, Soft and Hard Landscaping and Irrigation Network, Street Furniture, for land development for villas and residential units at Riyadh City South, Abu Dhabi.
